The benefits of being “Baffle Free”

IPA's patent pending design eliminates the need for expensive baffle bags by controlling the shape of the bag specific to each customer's requirement. No baffles equals easier fill and discharge along with eliminating many sifting issues common to the baffle bag design. In addition our design can be fitted with a standard or pre-shaped liner to give total product protection versus a baffle bag. Contact us for a custom proposal based on your specific requirements and applications.
